Re: Shelf life of NBP's fresh, domestic boxed beef products

The following shelf life warranties apply to the domestic NBP – Beef products described below.

- Boneless Primal/Sub primal 42 days
- Bone-In Primal/Sub primal 35 days

- Thin Meats (i.e., ball tip, tri tip, etc.) 28 days

- Stew Meat, Cubed Meat 14 days
- Spare Ribs, vac-pak 14 days
- Spare Ribs, non vac-pak 7 days
- Other non vac-pak products 7 days

- Ground Beef, Fresh 23 days
- Ground Beef Patties 24 days
- Ground Beef Bricks 24 days

- Beef Trim, bulk combo 7 days
- Beef Trim, fresh boxed 7 days

- Fresh Offal 30 Days
- Beef Livers 18 days

Note: Pack date = day 0

These shelf life warranties apply to products assuming that package integrity is maintained and that the product is kept 35 degrees F. or less during the distribution, warehousing and storage periods. Loss of package integrity or temperature abuse during the product warranty period may result in reduced shelf life of the product.

Product that is frozen prior to the maximum shelf life date, must be frozen rapidly and kept in a frozen state at 0° F or below to maintain the integrity of the product. Product that was in good quality condition (not past the recommended shelf life, temperature stressed or showing any signs of off condition or abuse) at the time of being frozen has a maximum shelf life of 12 months for best quality.

Sincerely,

Brenden McCullough
